SANDING BENCHES

Our sanding benches are suitable for all processes where harmful dust is produced: wood sanding, deburring metals, welding operations. They are made of zinc-coated sheet extra-thick. They can be supplied with removable side walls to facilitate the support of large pieces. At the bottom they are accompanied by one or two collection boxes for the heaviest materials.

Mod.	A	B	SUCTION		
	[mm]	[mm]	Ø1 [mm]	Ø2 [mm]	X
